

GOVERNMENT OF INDIA (भारत सरकार)  
MINISTRY OF RAILWAYS (रेल मंत्रालय)  
(RAILWAY BOARD)

No. 2015/TG.IV/13/6

New Delhi, dt. 20/09/2016

The General Manager  
All Indian Railways.

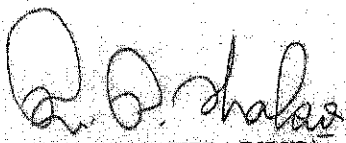

Sub : Railway Display Network Proof Concept (POC) implementation.

Ref : RCIL letter No. RCIL/2015/Mktg./RDN/285-II dt. 30/07/2016

Vide above letter (Para 1 & 2), RAILTEL had requested for payment of electricity charges on lump sum basis based on average electricity consumption of the equipment used for RDN POC at a particular station. RAILTEL had also requested for DG back up to ensure continuity of display of important passenger and train related information. The matter has been considered in Board and Member(Traction) has approved the request of RAILTEL to :

- (i) Pay electricity charges on a fixed lump sum basis calculated on the basis of average electric consumption of the equipment without the need to put up separate electricity meter.
- (ii) DRMs are authorized to hire additional DG sets for providing back up power to the RDN system as it is imperative to provide real time passenger information without interruption. The cost of hiring these generators will be including in the lump sum amount which will be charged from the POC partner at the time of calculating lump sum electric charges.

This issues with the concurrence of NFR Finance.
